UX / Experience Designer | Designer-Developer

SUMMARY

Computer Science graduate and designer-developer. I research what users and businesses need, design the experience, and build it — from user research, prototyping, and usability testing through to full-stack and front-end implementation (React). Comfortable owning a problem end to end, with hands-on operations experience that keeps my work grounded in real-world use.

SELECTED PROJECTS

- AI-Generated Video Platform for Restaurants** | *UX Research, Interaction Design, Figma* 2026
- MSc group project (Interactive Systems Design) with Splento — user-centred design for a mobile-first platform to discover, adapt, and license promotional video
 - Designed the final prototype, which shaped the project's final design direction; contributed to user research and co-wrote the report
 - Team of 5 across the full UCD cycle: survey + interviews, personas, iterative prototyping (paper to hi-fi), and comparative usability evaluation
- Nail Fairy Booking Website (nailfairy.co.uk)** | *React, Node, MongoDB, Tailwind* Jul-Sep 2025
- Designed and built a live, mobile-first booking flow (service → staff → time → confirm) to reduce scheduling conflicts and improve client flow
 - Server-side slot validation to prevent double-booking; service filtering, calendar picker, and confirmation logic
- Salon Management System (NSMS)** | *C#, SQL Server* Jun-Sep 2024
- Designed and built a desktop point-of-sale unifying bookings, sales, staff, inventory, and reporting
 - Dashboards and scheduling module used for day-to-day decisions
- 2D Platformer Game** | *Java* 2022
- Built a 2D action-platformer on a hand-rolled engine: collision handling, enemy AI, and sprite animation

EXPERIENCE

- Operations & Digital** Oct 2019 – Present
The Nail Fairy *Bradford, UK*
- Designed and launched the salon's online booking website to cut scheduling conflicts and improve client flow
 - Set up and optimised the Google Business profile (search and map visibility) and a review-collection workflow
 - Produced and edited photo/video content, building an online portfolio that boosted engagement
 - Ran end-to-end booking and payment operations, gaining direct insight into the users and workflows the software serves

SKILLS

Design: User research, interviews, usability testing, heuristic evaluation (Nielsen/Norman), personas, journey mapping, wireframing, prototyping, Figma
Technical: React, JavaScript, HTML & CSS, Tailwind, Node, Python, C#, SQL
Tools: Figma, Git & GitHub, VS Code, IntelliJ

EDUCATION

- Queen Mary University of London** London, UK
MSc Computer Science Sept 2025 – Present
- City, University of London** London, UK
BSc (Hons) Computer Science Sept 2021 – Sept 2025
- Relevant Coursework**
Data Visualization, Databases, Machine Learning, Data Structures & Algorithms, OOP, Interactive Design

ADDITIONAL

Right to work in the UK — no sponsorship required.
