EDUCATION

Queen Mary University of London

Master of Computer Science

London, UK

Sept. 2025 – Present

City, University of London

Bachelor of Science with Honours in Computer Science

London, UK

Sept. 2021 – Sept. 2025

Notre Dame Catholic Sixth Form College

Mathematics (A), Further Mathematics (C), Computer Science (B)

Leeds, UK

Aug. 2019 – June. 2021

Relevant Coursework

Data Structures & Algorithms, Data Visualization, Databases, Machine Learning, Object-Oriented Programming

EXPERIENCE

Technical & Operations Assistant

Oct. 2019 – Present

The Nail Fairy

Bradford, UK

- Managed end to end booking and payment workflows for daily salon operations
- Assisted technicians during busy periods with nail prep and polish, gaining hands-on service experience
- Managed social media platforms and integrated them with Google Business to drive
- Took and edited professional nail photos/ videos of customer, building a portfolio and boosting online engagement
- Set up the salon's Google Business profile, improving search visibility and map presence
- Implemented review collection workflow on Google Business to improve online presence
- Designed and launched the salon's online booking website to reduce scheduling conflicts and improve client flow

PROJECTS

Nail Fairy Booking Website (nailfairy.co.uk) | *React.js, MongoDB, Tailwind CSS*

July. 2025 – Sept. 2025

- Designed and implemented a full-stack booking system using a client-server architecture
- Implemented input validation and conflict handling for overlapping appointments
- Used React.js for dynamic UI and MongoDB for storing booking/service data
- Implemented appointment selection, service filtering, calendar picker, and confirmation logic

Nail Salon Management Software (NSMS) | *C#, SQL Server, Guna UI Framework*

June. 2024 – Sept. 2024

- Built a desktop application to manage bookings, sales, staff, inventory, and reporting
- Designed secure login, dynamic dashboards, POS system, and scheduling module

Face Mask Detection with Deep Learning | *Python, PyTorch, NumPy, Matplotlib*

April. 2024 – May. 2024

- Trained and evaluated 3 models (SVM, MLP, ResNet-18) to detect face mask usage with up to 98.03% accuracy
- Applied transfer learning and deep CNNs to classify images into Mask, No Mask, and Improper Mask categories

2D TFight Game | *Java, City Engine*

April. 2022 – June. 2022

- Developed a desktop 2D action-platformer with a main character and multiple enemies, levels
- Applied object-oriented design for scalable combat systems, collision handling, and chasing enemy
- Designed core gameplay features: health bars, ranged/melee attacks, boss fights, and dynamic levels

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript, HTML & CSS

Frameworks: React, .NET, Tailwind

Databases: PostgreSQL, MongoDB, SQL Server

Tools: Git, GitHub, Visual Studio, IntelliJ

Libraries: pandas, NumPy, Matplotlib

VISA STATUS

Right to work in the UK

No sponsorship required
